Description			
Hey there Arnud, When i start up xorg/awesome the screen is black, and i have to move the terminal window around to refresh those areas. Screen shots attached. Let me know how i can help you debug this. Thanks!! gentoo kernel 3.2.1 x86_64 intel core 2 quad Q9300 8g ram xorg 1.11.2-r2 nvidia-drivers: 290.10 nvidia 8800 GT			

History

#1 - 02/14/2012 02:54 PM - Arnaud Fontaine

- File *unagi_at_startup.png* added

Just for the record, this issue was reported by Bearcat Sandor ([#34](#)).

#2 - 02/14/2012 07:08 PM - Bearcat Sandor

- File *rc.lua* added

I've attached a copy of my rc.lua file so that it can be determined whether the problem is the way that urxvt is starting or the way Awesome is loading. My terminal is not loaded on startup, so it may just be the way that the wallpaper is being displayed (all using the defaults in the zenburn that ships with it).

#3 - 02/15/2012 07:11 AM - Arnaud Fontaine

Thanks. Which program do you use to set the background wallpaper (You can check that by running 'awsetbg -i')? Also, could you please redirect unagi output to a file in order to get the warnings, something like that should work:

```
awful.util.spawn_with_shell("unagi > /tmp/unagi.log 2>&1 &")
```

Thanks!

#4 - 02/15/2012 09:41 PM - Bearcat Sandor

- File unagi.log added

awesetbg -i gives me:

Esetroot is a nice wallpapersetter. You won't have any problems.

I use feh all the time. I could try that instead.

In the log file i see only:

WARN: event_handle_unmap_notify:636: Window 600033 disappeared

log file is attached.
