

Unagi Compositing Manager - Bug #46

Chromium overlays not properly mapped

03/05/2014 06:57 PM - Marc Dequènes

Status:	Closed	Start date:	03/05/2014
Priority:	Normal	Due date:	
Assignee:		% Done:	100%
Category:	Rendering	Estimated time:	0.00 hour
Target version:			
Description			
<p>The FlashControl Chromium plugin opens a tool overlay when clicking on its icon on the left of its URL bar. First screenshot shows it does not appear properly, only the left of the overlay is drawn. The second screenshot was not cropped, which means (by Gimp screenshot options) that this overlay is in fact in its own window. This one was made by moving the pointer, which unveiled buttons while flying over their intended space.</p>			

Associated revisions

Revision 439a3c0f - 03/06/2014 11:10 AM - Arnaud Fontaine

Whatever happens upon ConfigureNotify, the Window should be added to the damaged area (closes #46).
